Back Your Name and Reputation With Ours

Go Heavy
with dahl

The dahl Difference

Our Mission

Connecting quality products and peace of mind to homes, businesses and people for a lifetime.

Our Vision

To be the leading supplier of the highest quality valves and fittings while providing the highest level of service excellence.

Our Values

INTEGRITY
TEAMWORK
SERVICE EXCELLENCE
GROWTH

dahl is all you need

Get your hands on a dahl valve and you'll immediately feel the heavyweight construction that sets us apart.

As an industry leader for over 70 years, we understand that quality materials and precision manufacturing are key to the long-term durability you rely on with dahl.

That's why dahl products are designed and engineered in Canada, with manufacturing at our Canadian facility and through trusted manufacturing partners in the U.S. and Europe. We carefully source brass, raw materials, and components from high-quality suppliers in Canada, U.S., and Europe to ensure lasting performance and reliability.

Our lifetime warranty shows that the word quality means something more at dahl.

When you want valves that stand the test of time and are backed with excellent customer service, **Go Heavy** with dahl in your plumbing projects.

100% CANADIAN ROOTS, WORLD-CLASS PARTNERS

dahl is an independent, family-owned, Canadian company that designs and engineers premium plumbing and heating valves. To complement our Canadian legacy, we work with trusted U.S. and European partners, which allows us to expand our capabilities while ensuring the same premium quality, durability, reliability, and weight plumbers expect from dahl.

BACKED BY A LIFETIME WARRANTY

dahl's true lifetime warranty reflects our commitment to quality and durability. Our valves are guaranteed for the life of the installation and the warranty transfers with the property.

EXTENSIVE RANGE OF PRODUCT SOLUTIONS

To meet the unique, ever-changing needs of professional plumbers and wholesalers, we're proud to offer a full array of product solutions - for plumbing jobs done right.

SUPERIOR CUSTOMER SERVICE

When you call dahl, you'll never have to deal with automated menus or bots. Real people answer your call, ready to provide the expert support you need - because great customer service should always be personal.

DURABLE, DEPENDABLE PERFORMANCE

Eliminate call backs. Install dahl valves once and trust our quality and durability to do the rest.

Our Promise

Your life's work deserves a **lifetime warranty.**

Quality products, responsive service, and a range of reliable plumbing solutions are what we proudly provide to our customers every day.

For more details on dahl's Lifetime Limited Warranty, please reference page 63.

dahl Problem Solvers

PROVEN PARTS FOR UNIQUE CHALLENGES

To help you resolve unique challenges and retrofit repairs, dahl has engineered a full line of innovative parts.

RETROFIT VALVE
511-41-31

Install a new valve in seconds

UNIVERSAL TEE
510-33-43-43

Turns angle stops into dual shut-offs

HOSE-MATE™
521-04F-04

Convenient end-of-hose shut off

MALE PRESS VALVE
621-MP3-04

Easily installs into press fittings

PARTITION STOP
E2310-442008

In-wall shutoff for multi-residential and light commercial applications

WATER HAMMER ARRESTER
521-04F-04-WHA

The simple way to silence water hammer

NO SOLDER REPLACEMENT
521LB-33-33L

No need for a repair coupling

SKIRTED TOILET KIT
E33-2386-A

Don't cut open the wall - use dahl

FINISHING VALVE
511-33LE-31

Top quality finishing

TEST VALVE
521BLD-51-01L-51

Compact tool for air-testing piping systems

dahl **QUICK-GRIP™** Connection
SIMPLY PUSH IT ON!

EPDM O-RING | STEEL TEETH | LOCKING CLIP | RELEASE SLEEVE

1/2" COPPER

- No compression, no soldering - great for wet pipe

1/2" PEX

- No crimping, just use the supplied tube insert

1/2" CPVC

- No gluing

SIMPLE TO INSTALL - PUSH IT ON!
Cut pipe, deburr, clean, and push it on!

EASY REMOVAL AND RE-USE
No Disconnection Tool Required

dahl originated the hand-operated Release Sleeve. Follow installation instructions for removal.

REDUCES YOUR INVENTORY!
One connection for three different pipe types.

CERTIFIED & CODE COMPLIANT
CSA and IAPMO approved to ASSE 1061, NSF/ANSI 372 (formerly NSF/ANSI 61-G).

QUICK-GRIP™ (COPPER, PEX, CPVC)

#611-33LE-31

- Ideal for toilets, pedestal sinks, and bidets
- No soldering required
- Models also available for iron and PEX pipes
- Cover the stub-out pipe with the chrome finished coupling and rust proof escutcheon

COPPER - COMPRESSION

PATTERN	FINISH	DESCRIPTION	PART NUMBER	BOX/MSTR

- Easily upgrade to a 1/4 turn mini-ball™ valve in seconds
- Leave old joints in place and save time
- Fits 3/8", 1/2", or 5/8" OD compression connections
- Available in angle or straight pattern, dual outlet, and water hammer arrester options

STRAIGHT

ANGLE

- Compact design
- For dishwasher, water filter, icemaker, instant hot, and many other appliances
- Available with Loose Key operation

NO SOLDERING REQUIRED!

- Better flow than old globe valves
- Replace old valves quickly
- Safe when soldering is not
- Available for 1/2" or 3/4" copper pipe

FOR WINTERIZING & WATER HEATERS

3 EASY STEPS

INSTALLS EASILY EVEN ON WET PIPE

COMPARE THE FLOW | Cv = Flow in USGPM with 1 PSI pressure drop

GLOBE VALVE

Cv = 2.3
Cv = 4.0

NO SOLDER VALVE

Cv = 7.5
Cv = 6.5

The Perfect Balancing Act for All Types of Radiant Floor Systems

- Compact design
- Separate shut-off & balancing
- Simple to balance by loop length
- Available for copper, iron, PEX, PEX-AL-PEX, and CPVC
- Working pressure: MAX 250 PSI depending on pipe materials
- Working temperature: MAX 250°F depending on pipe materials
- Metering spindle adjusts with 1/8" Allen Key - not included
- Memory spindle adjust average 10% of full flow per turn
- Remove safety cap and set memory spindle according to chart

121BAL-13-PX3
1/2 Fem. Solder x 1/2 PEX Crimp

For balancing of manifolds, open the memory spindle fully for the longest loop and balance the other loops by setting their memory spindles according to their loop lengths relative to the longest loop.

TYPICAL *FLOW CHART
Cv 1/2" = 3.0 (full open)
3/4" = 6.0 (full open)
* Approx. values - Cv Numbers vary with different pipe connections

EXAMPLE: Four loop manifold

- Longest loop = 250' set memory spindle 250/250 x 10 = 10 turns open
- Loop #2 = 200' set memory spindle 200/250 x 10 = 8 turns open
- Loop #3 = 125' set memory spindle 125/250 x 10 = 5 turns open
- Loop #4 = 100' set memory spindle 100/250 x 10 = 4 turns open

Water Hammer Arrester Products - The Simple Way to Silence Water Hammer

DID YOU KNOW?

Water hammer may result in:

- Noisy pipe banging and rattling
- Fitting failures
- Accelerated wear on connectors
- Burst connectors
- Premature failure of washing machine hoses, one of the primary causes of floods in homes
- Appliance solenoid failures - these costly repairs may not be covered by the appliance manufacturer's warranty

Problem: Water Hammer

While water hammer is often associated with banging, rattling, and thumping, water hammer doesn't always make these noises. Water hammer happens when the flow of water in a pipe is suddenly stopped by a quick closing valve.

Quick closing valves cause a pressure spike and reverberation inside the pipe until the spike dissipates. While metallic pipes are more likely to make an audible noise, water hammer also occurs in PEX and other plastic pipe systems. Usually, an air pocket in the system will absorb the pressure spike, but if no pocket of air is present, fixtures and appliances in the plumbing system may be damaged by the pressure spikes.

Air chambers of capped stand-pipes are typically incorporated into plumbing systems to provide the air pocket necessary to prevent water hammer. However, in these devices, there is nothing separating the air and water. This allows air to permeate into the water within weeks, resulting in waterlogged and completely ineffective water hammer protection.

Constant solenoid on/off cycles during each load can cause:

- Pressure spikes resulting in water hammer: rattling, noisy pipes
- Extensive damage including solenoid failure, water line bursts, and other system failures

Quick closing valves are found in:

- Washing machines
- Dishwashers
- Icemakers
- Single lever faucets
- Touchless automatic faucets
- Toilets

Traditional air chamber method

Uses a section of pipe to trap air for shock absorption, offering limited and inconsistent water hammer control. Notice the difference in water level of the static water pressure on the left, in comparison to after the shut-off.

Water pressure is static

Water flows out, some air escapes

Upon shut-off, shock and turbulence occurs, and this is where you will hear the pipes rattle

After the shut-off, the water level will rise due to the depleted air

Repeated cycles: Water logging will eventually occur

dahl 1/4 Turn Retrofit Supply Stop With Integral Water Hammer Arrester

#511-41-31-WHA
3/8 OD Fem. Comp x 3/8 OD Comp
x Water Hammer Arrester

- Long-life, no waterlogging
- Installs at any angle

Water Hammer Arresters differ from air chambers in that they permanently separate air from the water. When a dahl water hammer arrester product is used, the pressure spike pushes a double O-ring sealed piston against a pressurized cushion of air, absorbing the pressure spike and preventing water hammer.

dahl Water Hammer Arresters are available in the "AA" size which are recommended for point of use residential applications. For best results, they should be installed as close as possible to the end point device, less than 2m (6 ft.). The O-ring sealed piston allows for installation at any angle, without loss of the pressurized air. These arresters have been tested to 500,000 cycles without failure, and are guaranteed to control water hammer for the lifetime of the water system.

dahl Water Hammer Arresters are certified to the ANSI/ASSE 1010 standard by the American Society of Sanitary Engineering and are recommended by both the Uniform Plumbing Code (UPC) and International Plumbing Code (IPC). Many local building codes now require the use of engineered water hammer arresters to protect plumbing systems and extend the life of appliances.

dahl Water Hammer Arrester products include: Supply Stops, Dual Shut-off-Valves, In-Line Stops and Isolation, Outlet Box Valves, Supply Kits, Tee & Valve Kits, and even Retrofit models that simply piggy-back in between existing valves/fittings and riser/hoses.

Solution: Prevent it!

Constant solenoid on/off cycles still occur during each load, but:

- Piston compresses air, cushioning water on quick shut-off
- Pipes are quiet, no water hammer
- No potential solenoid and water line failures

OPERATION

Choose a variety of methods for operating the valve, from different colors of handles to Loose Key with Screwdriver Slot. Available on all mini-ball™ Valves.

	DESCRIPTION	MODIFY PART NUMBER	PART NUMBER EXAMPLE
	Red Handle	3rd Digit of Valve # - 4	624-08-04
	Blue Handle	3rd Digit of Valve # - 5	625-08-04
	Loose Key with Screwdriver Slot and Lockshield Key sold separately	Replace 3rd Digit of Valve # with "6SS"	616SS-33-31
	Loose/Lockshield Key		9941

TAG HOLE IN HANDLE

The 3/16" tag hole enables labeling of the valves in a basement or mechanical room, making it simple for future identification without having to trace lines or reference original mechanical blueprints.

	DESCRIPTION	MODIFY PART NUMBER	PART NUMBER EXAMPLE
	Drilled Handle (3/16" hole drilled in handle for tags)	Add "DH"	521DH-PX3-PX3
			
			

DRAIN FEATURE

Create a stop & drain valve. Available on both straight and angle pattern models. Add "D" to the Outlet in the part number as shown below:

	DESCRIPTION	MODIFY PART NUMBER	PART NUMBER EXAMPLE
	Drain Provision	Add to Part # - D	521-13-13D

POLYBAG PACKAGING

Any valve can be ordered in a polybag with the dahl part number and UPC code printed on the bag. Installation instructions are also included on every bag.

DESCRIPTION	MODIFY PART NUMBER	PART NUMBER EXAMPLE
Plastic Bagging with UPC bar code	Add to Part # - BAG	611-33-31-BAG

CAP & CHAIN

Valves with hose outlet can be ordered with a Cap & Chain attached to the handle.

DESCRIPTION	MODIFY PART NUMBER	PART NUMBER EXAMPLE
Cap & Chain	Add DH beside operation type and CC beside hose connection in the part number	621DH-01-04CC

VALVES WITHOUT COMPRESSION NUTS

Any valve with a compression outlet for copper pipe can be ordered without the compression nut & sleeve (ferrule).

DESCRIPTION	MODIFY PART NUMBER	PART NUMBER EXAMPLE
Shank Nut for Outlet Box Valves	Add "NUT"	621-08-04-PK2-NUT

Full Port Ball Valves

Strength in Every Detail,
Engineered for Reliability.

- **Lead-Free Brass Construction:** Dezincification-resistant, lead-free, and sustainable for long-term reliability and safety.
- **Premium Ball Finish:** Ensures superior abrasion and corrosion resistance, extending valve life.
- **Optional Drain Port Version:** Allows easy system draining and winterization.
- **CSA Certified to NSF 61 & 372:** Meets all North American plumbing standards for compliance and peace of mind.

Crafted from **lead-free brass***, dahl's Full Port Ball Valves deliver efficient and durable plumbing solutions with high strength, exceptional wear resistance, and superior corrosion protection.

Expert machining ensures smooth operation and long service life, while the engineered ball features a **premium finish** for added abrasion and corrosion resistance. Backed by a **lifetime warranty**, dahl's Full Port Ball Valves offer reliability and sustainability you can trust.

*CW724R lead-free brass alloy

Application

- Water Supply Systems
- Hydronic Heating Systems
- Plumbing Fixtures
- Irrigation Systems
- Potable Water Systems

THE SELF-ADJUSTING DESIGN THAT SAVES YOU TIME

Since their introduction in 1963, dahl's 2300 series valves have been recognized for their exceptional serviceability—a standard we continue to promote today.

ELIMINATES THE NEED FOR ACCESS BOXES

- No need to flush cut the tube. The extra deep stainless steel partition plate covers the protruding portion.
- No tube removal and no marking of the finished wall when cutting tube!

See Repair Parts and Accessories for Keys and Plates.

Isolate water supply to each unit in a multi-residential building. A discreet alternative to bulky access boxes, compact wall plates make installations more flexible in tight locations, and more subtle in exposed locations. The stainless steel Partition Stop Plate offers a sleek finishing option that can even be painted.

MINIMUM ROUGHING-IN DIMENSIONS

VALVE SIZE	MIN "M"
1/2"	2-7/8"
3/4"	3 1/8"

Same for angle and straight patterns

#9921 PARTITION PLATE sold separately

Allow minimum 3" between hot and cold as partition plate has a diameter of 2-1/2"

In-Wall Shutoff for Multi-Residential & Light Commercial Applications

Kits

dahl plumbing supply kits contain all the proven quality parts you need, helping make your job easier.

Our supply kits and plumbing kits mean no forgotten parts and no problems.

- Standard supply kits contain parts for a typical sink install.
- Skirted toilet kits offer the industry's best solution for upgrading to a skirted toilet without cutting into the wall and moving the existing stub-out.

The Most Flexible Solution for Multiple Hook-Ups

Carry Less Stock with Universal Tee

Use the stops already on your truck to build dual shut-offs on the spot. No need to carry every configuration or make extra trips to the supply house. With just two tee patterns, you can create over 20 dual shut-off setups. Each Universal Tee features a female compression connection with a swivel union nut, making it easy to dial in the perfect riser layout every time.

Fewer parts. More flexibility. Maximum efficiency.

- Eliminates costly multiple dual shut-off inventory
- Simplifies installation
- Works with any manufacturer's 5/8 OD Comp (1/2 Nom. Pipe) Supply Stop
- Add standard stops to Universal Tee to create custom dual shut-off stops configurations

Strapping

dahl All Round™ Strapping is available in steel, galvanized steel, copper, and nylon coated, with load ratings from 60 to 130lbs.

- Our plumbing strapping comes in color-coded dispenser packages for easy identification.
- Wavy, smooth-edged design prevents kinking and ensures uniform strength.
- dahl All Round™ Strapping is available in a variety of load ratings to keep pipes and other important items safe and secure.

1001 USES

- 1/2" straps have 3/16" bolt holes
- 3/4" straps have large holes for 1/4" bolts and small 1/8" holes for screw or nails

HANDY DISPENSER CARTON

1/2" - 22GA | 3/4" - 24GA

Submittal sheets are available for **mini-ball™** Valves, Globe Stops, Globe Style Radiators, and Balancing Valves

dahl•ECO™ mini-ball™ Valves

STRAIGHT PATTERN

ANGLE PATTERN

WORKING PRESSURE

- Up to 250 PSI/250°F depending on pipe material and end connections

HEAT RESISTANT

- Do not disassemble; solder in open position

CORROSION RESISTANT

- Highly resistant to dezincification and stress corrosion cracking
- Meets requirements of NSF 14 (ISO 6509 and ASTM B858)

LISTINGS, WHERE REQUIRED TO

- CSA
- UPC (IAPMO)
- NSF/ANSI/CAN 61: Q≤0.5
- NSF/ANSI/CAN 372 (Formerly NSF/ANSI 61-G)

Meets CSA and ASME Flow Requirements

APPROXIMATE CV (depending on pipe connections)

- 1/2 = 3.0
- 3/4 = 6.0

MATERIALS

- Brass body
- Lead-free compliant alloy
- Plated or coated zinc handle
- PTFE, Fluorocarbon (FKM), and EPDM seals

ADVANTAGES

- Exceeds lead-free* compliance requirements
- Quick 1/4 turn on or off
- No adapters needed - thousands of models available
- Two-stem O-rings for safety
- Low-friction PTFE seals
- Compact design
- Drain/waste models available
- Tamper resistant operation available
- Multiple applications for plumbing and heating
- dahl Quality - each **mini-ball™** valve is tested before leaving our plant

*Lead-free means the weighted average lead content is less than 0.25% on wetted surface areas.

GALVANIZED STEEL

DESCRIPTION	LOAD MAX LBS.	PART NUMBER	BOX/MSTR
3/4" x 10' - 24 Gauge	150	9043	- / 40
3/4" x 25' - 24 Gauge	150	9047	- / 20

NYLON COATED (GALVANIZED STEEL)

DESCRIPTION	LOAD MAX LBS.	PART NUMBER	BOX/MSTR
1/2" x 25' - 24 Gauge	110	9080	- / 20
1/2" x 10' - 24 Gauge	110	9090	- / 40

SOLID COPPER

DESCRIPTION	LOAD MAX LBS.	PART NUMBER	BOX/MSTR
1/2" x 25' - 22 Gauge	60	9050	- / 20
1/2" x 10' - 22 Gauge	60	9053	- / 40

STEEL

DESCRIPTION	LOAD MAX LBS.	PART NUMBER	BOX/MSTR
1/2" x 25' - 22 Gauge	110	9010	- / 20
1/2" x 10' - 22 Gauge	110	9015	- / 40
3/4" x 25' - 24 Gauge	130	9020	- / 20
3/4" x 10' - 24 Gauge	130	9021	- / 40

GLOBE STOPS

APPLICATION

- Potable water plumbing systems

WORKING PRESSURES

- 200 PSI/180°F

LISTINGS

- CSA
- Meets full flow requirements

MATERIALS

- Cast brass body, lead-free compliant alloy
- Smooth die cast zinc handle, powder coated
- Spring-loaded self-adjusting EPDM packing system
- EPDM disc

#E2312-44

#E2311-44

GLOBE RADIATOR & BALANCING VALVES

APPLICATION

- Forced water heating & cooling systems

WORKING PRESSURE - REGULAR PATTERN

- Hot water 200 PSI/250°F

WORKING PRESSURE - HEAVY PATTERN

- 250 PSI/250°F on forced hot water systems (and low pressure steam systems up to 15 PSI)
- Not suitable for one-pipe systems

MATERIALS

- Cast brass body
- Smooth heat resistant plastic handle; molded in colour handle
- Spring-loaded, self-adjusting EPDM packing system
- EPDM disc (Regular Pattern)
- Glass-filled PTFE disc (Heavy Pattern)

REGULAR PATTERN

#11021-4112

HEAVY PATTERN

#11042-6113

ADVANTAGES

Maintenance Free

Spring loaded, self-adjusting packing system

Field Proven

Specified and installed across Canada since the 1960's

dahl Quality

Each valve is tested before leaving our plant

Heat Resistant

Do not disassemble; solder in open position

Lifetime Limited Warranty

dahl is pleased to announce a Lifetime Limited Warranty as of September 1, 2013.

WHAT DOES IT COVER?

mini-ball™ Valve, Full Port Ball Valves, Fitting, and Globe Style Valve products (the “products”) sold after Sept. 1, 2013, shall be free from defect in materials and workmanship, under normal use and service.

WHAT IS dahl’s DEFINITION OF “LIFETIME”?

The warranty period is for the lifetime of the installation commencing on the installation date of the product.

IS IT TRANSFERABLE?

Yes, the product warranty is transferable upon sale of the property.

HOW DOES dahl COMPENSATE ME FOR A WARRANTY CLAIM?

- dahl will replace the product with one of like quality, grade, and function.
- dahl will pay up to \$50 in labor charges for the de-installation or re-installation of a replacement product.
- dahl will pay mailing costs incurred to send a replacement product to the Claimant.

Complete details are available at dahl’s new website:
